

Best Practice Software Training

Speaker: Katrina Otto

Workshop description

Northern Queensland Primary Health Network will be delivering face-to-face workshops for practices and staff, to upskill and empower practice staff.

Two workshops will run per day. One session will suit intermediate and beginner users of Best Practice software (Bp Premier), and the other session will be an advanced workshop.

Session 2—advanced workshop

Learning objectives:

- ensure compliance of general practice standards with essential demographic and clinical data collection requirements (including coding)
- develop a team approach to quality data entry and use clinical software as a tool for practice improvements and patient chronic condition management
- develop an understanding of advanced billing processes including minimising exceptions
- perform advanced reporting functions including monitoring performance of key indicators
- use available data analytic tools to meet accreditation and incentive changes
- import and modify templates.
