

## Integration and Chronic Disease Management Stakeholders Forum

Speaker: Professor Brian Dolan

### Workshop description

The goal of this forum is to assist in the implementation of patient-focussed integrated chronic disease management in the Cairns region.

### Objectives for the day:

- develop relationships between primary, secondary, and tertiary care providers
- provide a collaborative, consultative environment to explore evidenced based improvements in services
- explore options to develop patient focused, innovative, integrated services
- develop a plan for engagement and innovative communication with stakeholders around chronic disease
- form an integrated chronic disease GP specialist group to work on planning, implementing, and evaluating services to align with the chronic disease model of care—e.g. keeping kidneys.
